CENSORSHIP: POLICY AND PRACTICE DURING
THE SECOND WORLD WAR

**BRITISH ONLINE
ARCHIVES**

Explore British postal and telegraph censorship...

...throughout a pivotal era of modern history.

This collection begins by surveying the first steps that were taken, in 1939, to implement censorship. Censorship units sprung up across the British empire, typically employing local people, especially women. They were tasked with monitoring all communications that could reveal sensitive information to the enemy. Censorship became a wide-ranging, international endeavour involving Britain, the Dominions, colonies, Allies, and neutral states such as the Republic of Ireland.

Policies and official guidance poured out from London with a view to keeping the censorship system efficient. Censors from various backgrounds became adept at breaking codes and recognising suspect material. They ensured that all correspondence was assessed, flagged (if necessary), and passed on. Towards the end of the war and following the Allied victory, censorship units took on a new responsibility: monitoring communications in occupied territories, including Austria, Germany, and Italy.

DON'T

SEND MESSAGES OF A CRYPTIC NATURE.
REFER TO DATES OF ARRIVAL, DEPARTURE, OR
NAMES OF BRITISH SHIPS.

Censorship became one of the most important fronts in the so-called "secret war".

Innovative ways to evade censorship were always being developed. Japanese prisoners of war created codes, based on anagrams, to convey information about their conditions and treatment.

This collection contains over 17,000 images collated from Ministry of Defence files.

As this fascinating collection illustrates, censorship was not only a tool that helped win the war, it was also a vital part of securing the peace that followed.

Censorship: Policy and Practice During the Second World War is a rich resource for students and researchers with interests in military and political history, the history of the British empire, international relations, and security and intelligence.

"The work of the Censorship is of a highly confidential nature and must on no account be discussed outside the rooms in which it is actually carried on" — *Handbook of Instructions and Orders for the Postal Censorship Staff* (DEFE 1/36/11).

Censorship infrastructure had to be constructed, furnished, and, importantly, staffed across Britain's empire.

The collection offers valuable insights into how censorship was operating in enemy and Allied territories. It includes official documents detailing how censorship practices varied in areas under Nazi rule.
